

# SALESFORCE MADE SIMPLE

— A GUIDE TO CERTIFICATION PATHS —

# START HERE. GO ANYWHERE.

Salesforce Certification is the ultimate benchmark that recognizes the skills, expertise, and real-world know-how of today's cloud specialists. Are you an Administrator who keeps Salesforce running smoothly, or Developer who builds new apps to customize and extend capabilities? Perhaps you're an Implementation Expert or Marketing Specialist responsible for ensuring the right solutions are deployed for maximum effectiveness. Or are you an Architect who masterminds high-performance technical frameworks?

Whatever your role, achieving your goals starts with getting Salesforce Certified. This guide will help you get there.

**ADMINISTRATORS**

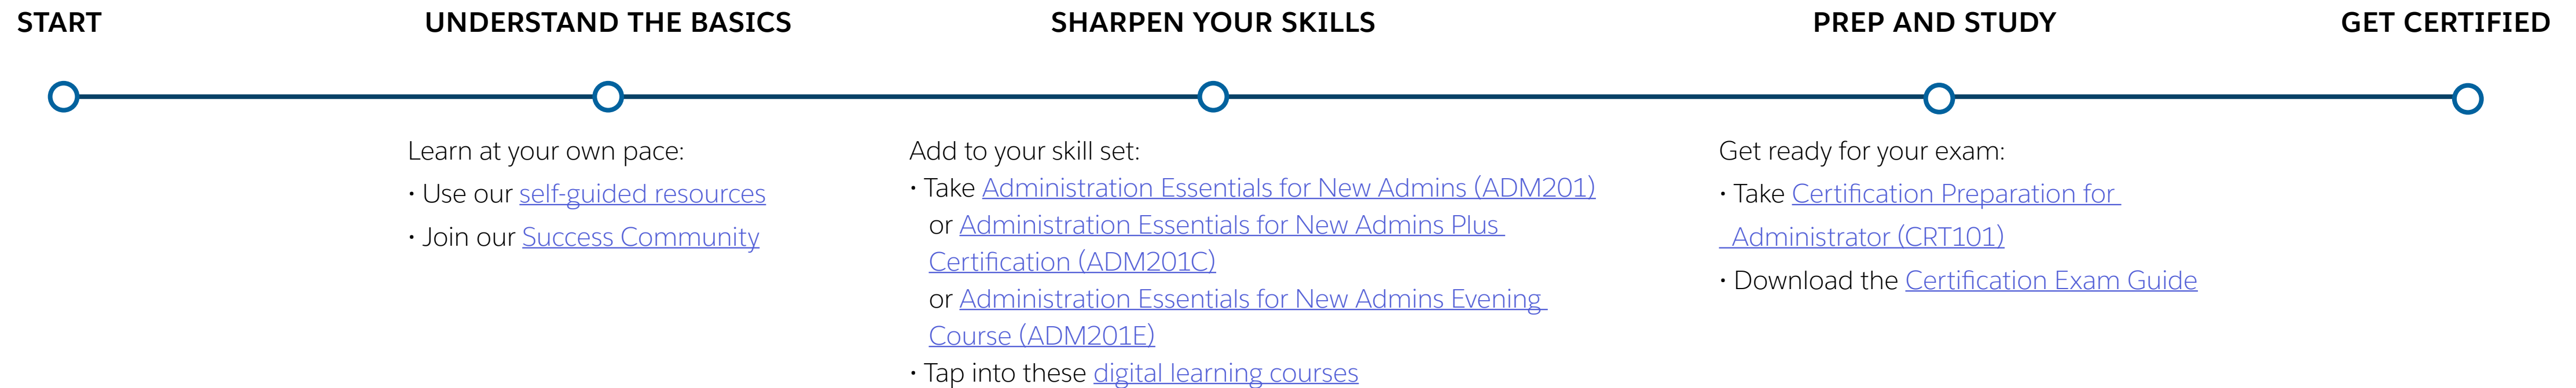

# ADMINISTRATOR

The Salesforce Certified Administrator exam is intended for an individual who has experience performing as a Salesforce Administrator.

- 6 Digital Learning Courses
- 8 Instructor-Led Classes
- 2 Trailhead

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Managing users, data, and security
- Maintaining and customizing Sales Cloud and Service Cloud apps
- Building reports, dashboards, and workflows

### RELATED CERTIFICATIONS

- [Certified Administrator](#)
- [Certified Advanced Administrator](#)
- [Certified Platform App Builder](#)

### PREREQUISITE CERTIFICATIONS

○ None

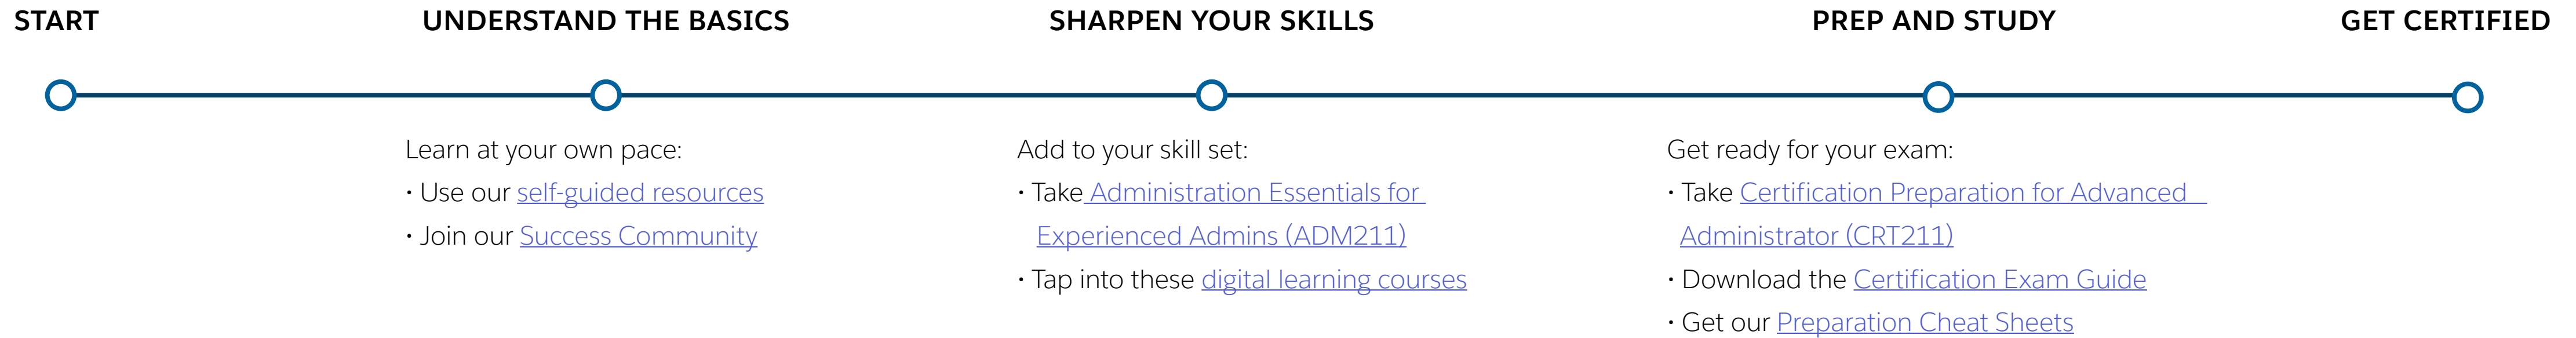

# ADVANCED ADMINISTRATOR

The Salesforce Certified Advanced Administrator credential is designed for those who have advanced-level experience as a Salesforce Administrator.

- 2 Digital Learning Courses
- 2 Instructor-Led Classes
- 2 Trailhead

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Leveraging the advanced administration capabilities of Salesforce
- Optimizing and extending Sales Cloud and Service Cloud apps
- Designing advanced reports, dashboards, and business-process automation

### RELATED CERTIFICATIONS

- Certified Administrator
- **Certified Advanced Administrator**
- Certified Platform App Builder

### PREREQUISITE CERTIFICATIONS

- Certified Administrator

**ARCHITECTS**

# SALESFORCE ARCHITECT JOURNEY

## YOUR JOURNEY TO THE SUMMIT

The Salesforce Architect Journey is a framework to help you acquire expertise as you chart your way to Salesforce Domain Architect, and the coveted Salesforce Certified Technical Architect credentials. You progress by building your skills and knowledge in specific domains, accumulating specialized domain Salesforce certifications along the way. The framework is well-served by our library of robust, free, self-directed training guides, which are aligned to each certification.

\* Credential earned upon completion of exams within the specializations tier, no additional exam requirements.

\*\* Credential earned upon successful completion of the Domain Architect tier and Review Board.

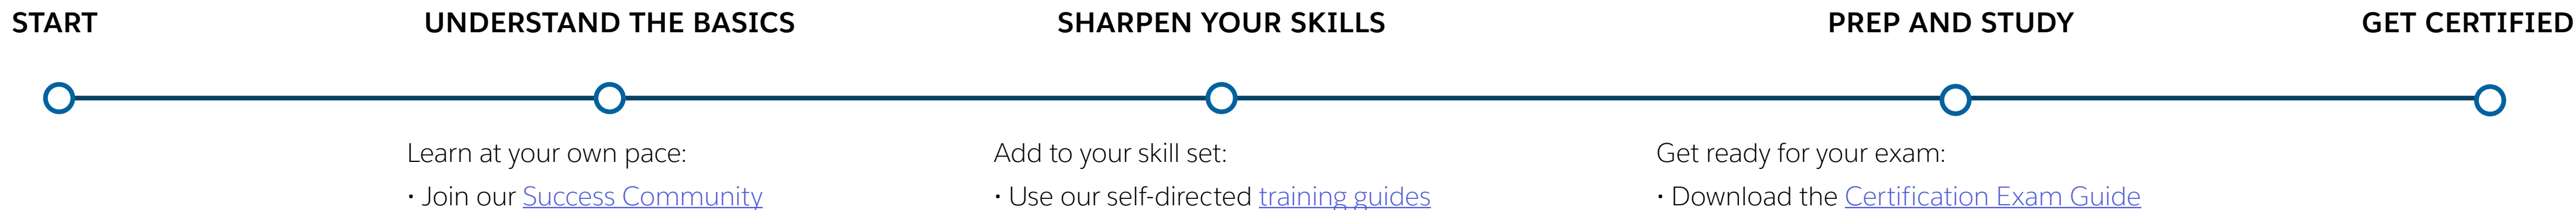

# APPLICATION ARCHITECT

The Salesforce Certified Application Architect credential is designed for those who have a deep understanding of native Salesforce features and functionality, as well as the ability to model a role hierarchy, data model, and appropriate sharing mechanisms.

## CERTIFICATION PATH

### OVERVIEW

Once all four prerequisites have been completed successfully, the Salesforce Certified Application Architect certification will be granted.

You should consider earning both your Salesforce Certified System Architect and Application Architect credentials. By earning these credentials, you'll take a big step toward preparing to become a Salesforce Certified Technical Architect.

### RELATED CERTIFICATIONS

- [Application Architect](#)
- System Architect
- Technical Architect

### PREREQUISITE CERTIFICATIONS

- Data Architecture and Management Designer
- Sharing and Visibility Designer
- Platform Developer I
- Platform App Builder

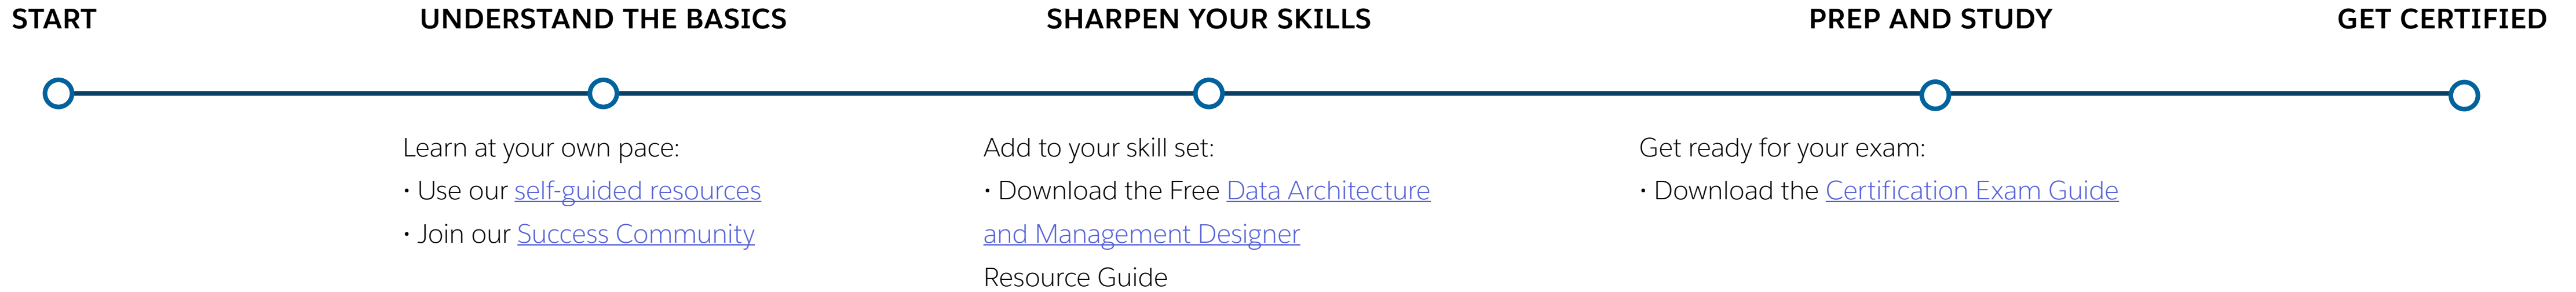

# DATA ARCHITECTURE AND MANAGEMENT DESIGNER

The Salesforce Certified Data Architecture and Management credential is designed for those who assess the architecture environment and requirements to design sound, scalable, and high-performing solutions on the Force.com platform as it pertains to enterprise data management.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Awareness of platform-specific design patterns and key limits
- Understanding of large-data-volume considerations, risks, and mitigation strategies

- Understanding of LDV considerations with communities
- Able to design a data and sharing model that supports an LDV environment
- Understanding data-movement best practices in an LDV environment
- Understanding strategies to build an optimized and high-performing solution

### RELATED CERTIFICATIONS

- Certified Development Lifecycle and Deployment Designer
- Certified Integration Architecture Designer
- **Certified Data Architecture and Management Designer**

### PREREQUISITE CERTIFICATIONS

None

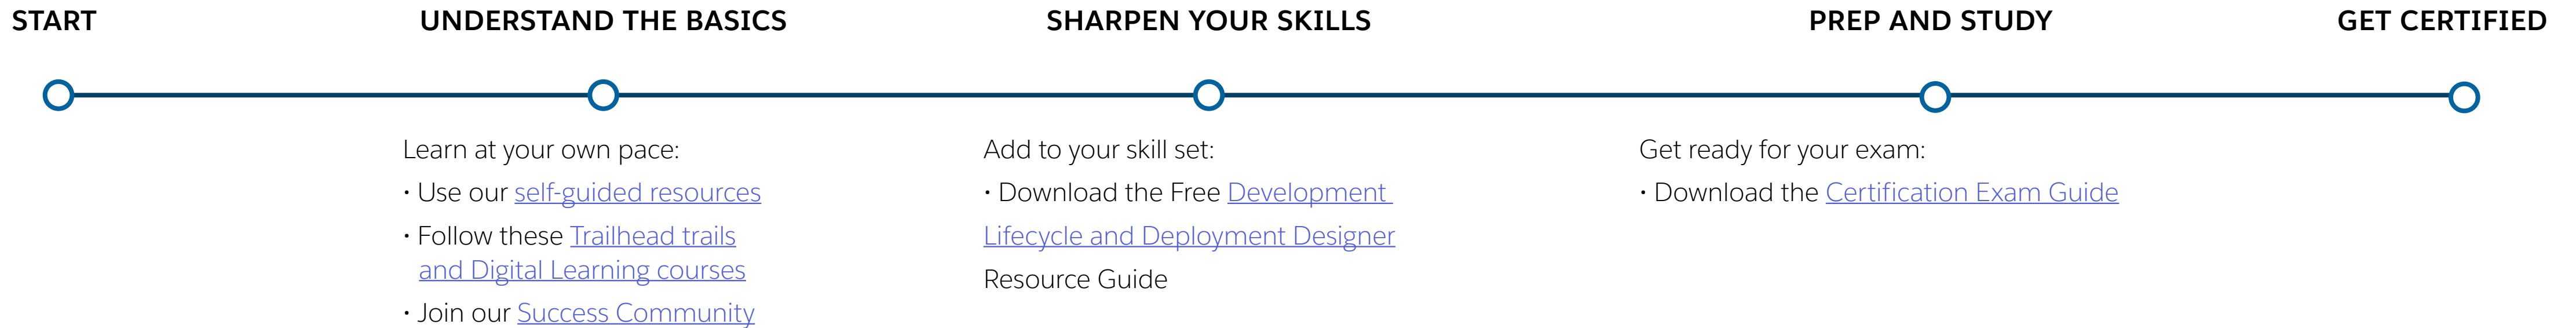

# DEVELOPMENT LIFECYCLE AND DEPLOYMENT DESIGNER

The Salesforce Certified Development Lifecycle and Deployment credential is designed for those who assess their architecture environment and requirements, and then implement management solutions on the Force.com platform that meet those requirements.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Experience with project and development lifecycle methodologies
- Experience providing requirements traceability through the project's lifecycle

- Awareness of Salesforce and third-party app development lifecycle tools
- Understanding test-plan design and evaluating effectiveness

### RELATED CERTIFICATIONS

- Certified Integration Architecture Designer
- Certified Data Architecture and Management Designer
- **Certified Development Lifecycle and Deployment Designer**

### PREREQUISITE CERTIFICATIONS

None

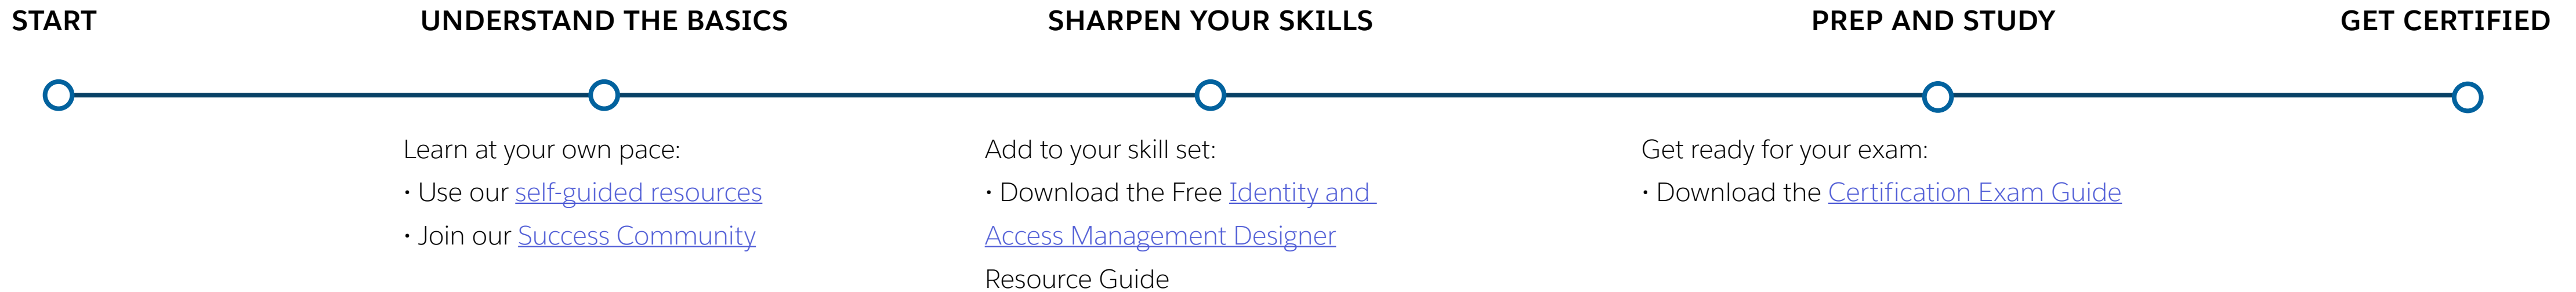

# IDENTITY AND ACCESS MANAGEMENT DESIGNER

The Salesforce Certified Identity and Access Management credential is designed for those who assess the architecture environment and requirements and design sound, scalable and high-performing solutions on the Force.com platform that meet the Single Sign-on (SSO) requirements.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Understanding configuration requirements of delegated authentication
- Understanding Cconfiguration requirements of SAML
- Awareness of when to use IDP initiated vs. service provider initiated

- Able to describe provisioning and de-provisioning related to SAML, Oauth, and OpenID Connect
- Understanding of how trust is established between an Identity Provider and a Service Provider
- Able to determine the general identity federation capabilities that are available for a given project

### RELATED CERTIFICATIONS

- Mobile Solutions Architecture Designer
- Sharing and Visibility Designer
- **Identity and Access Management Designer**

### PREREQUISITE CERTIFICATIONS

None

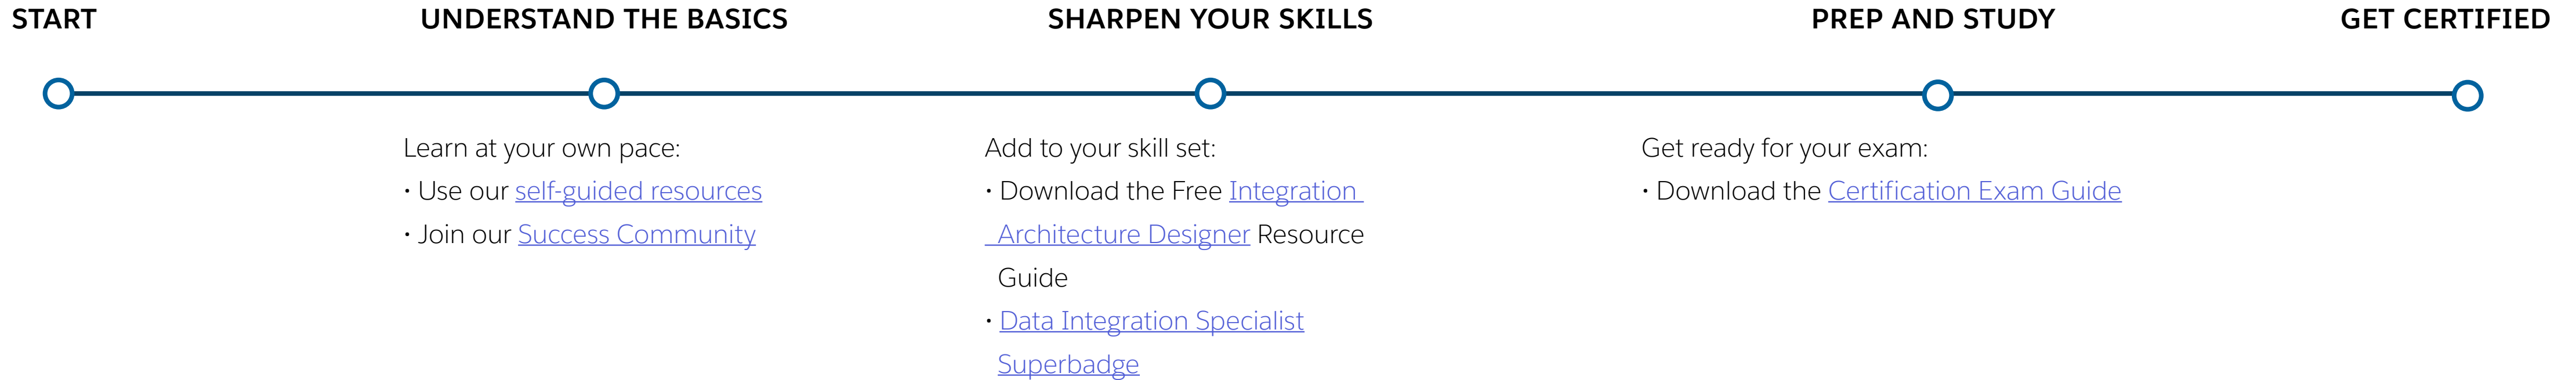

# INTEGRATION ARCHITECTURE DESIGNER

The Salesforce Certified Integration Architecture credential is designed for those who assess the architecture environment to design sound and scalable technical solutions on the Force.com platform that meet end-to-end integration requirements.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Experience holding a technical architect role on multiple complex deployments or equivalent knowledge through participation and exposure to these types of projects

- Thorough understanding of web services in general and SOAP and REST specifically; understanding of the basic workings of HTTP/S
- Understanding the different Force.com APIs and able to design solutions using the appropriate API
- Understanding data migration considerations, design trade-offs, and common ETL tools

- Experience with common integration patterns used on the Force.com platform
- Understanding patterns and mechanisms to secure integrations such as TLS for HTTP

### RELATED CERTIFICATIONS

- Certified Development Lifecycle and Deployment Designer
- Certified Data Architecture and Management Designer
- **Certified Integration Architecture Designer**

### PREREQUISITE CERTIFICATIONS

None

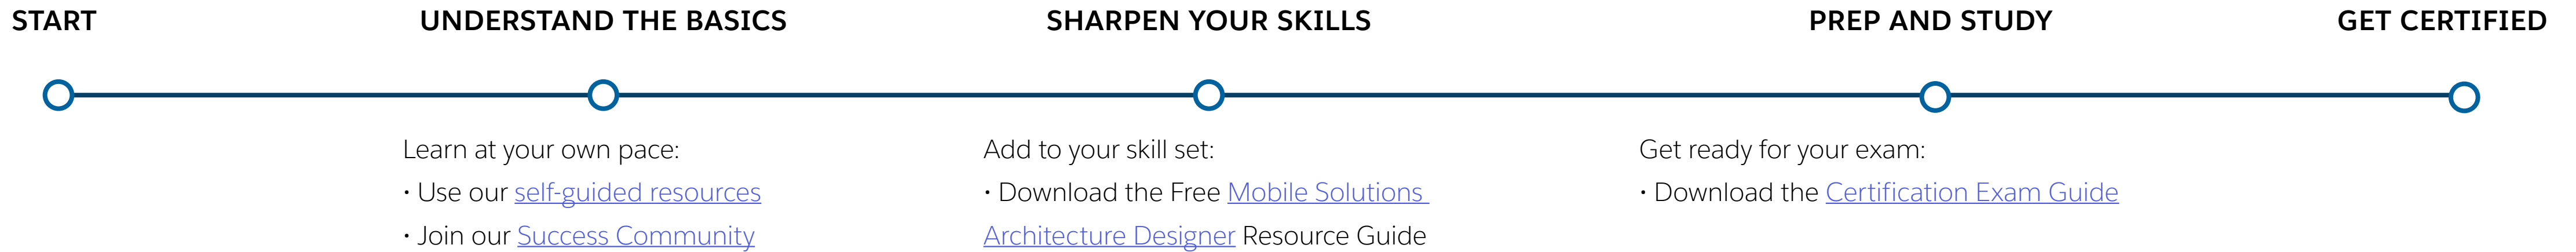

# MOBILE SOLUTIONS ARCHITECTURE DESIGNER

The Salesforce Certified Mobile Solutions Architecture Designer credential is designed for those who assess the architecture environment and requirements and design and implement sound and scalable mobile solutions on the Force.com platform that meet those requirements.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Describing the differences between Salesforce1, Native, HTML5 and Hybrid mobile architectures
- Defining how a customer can choose between Salesforce1 solution and a Customer Mobile Solution

- Understanding the Salesforce1 app and its configuration and customization options

- Describing how mobile solution capabilities can be enhanced via connected devices (e.g., Wearables, iBeacons)

- Identifying key potential pain points in a mobile solution and the ability to recommend key mitigation strategies for each

- Understanding of the Salesforce Mobile SDK to leverage salesforce data, provide offline capabilities and perform push notifications

### RELATED CERTIFICATIONS

- Identity and Access Management Designer
- Sharing and Visibility Designer
- **Mobile Solutions Architecture Designer**

### PREREQUISITE CERTIFICATIONS

- None

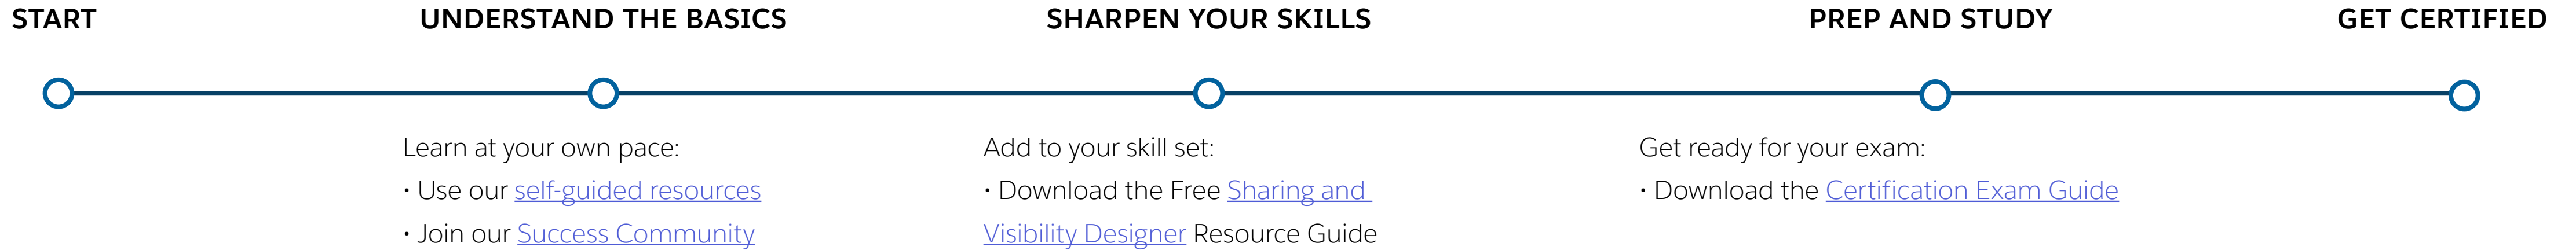

# SHARING AND VISIBILITY DESIGNER

The Salesforce Certified Sharing and Visibility credential is designed for those who assess the architecture environment and requirements and design sound, scalable, and high-performing technical solutions on the Force.com platform that meet sharing and visibility requirements.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Creation of criteria based and ownership based sharing rules
- Understanding of org wide defaults
- Understanding of various types of licenses

- Able to describe the fundamental concepts around role hierarchy
- Articulate how Profile configuration impacts a security and sharing model
- Understanding of Apex Sharing is and when it should be used

### RELATED CERTIFICATIONS

- Identity and Access Management Designer
- Mobile Solutions Architecture Designer
- Sharing and Visibility Designer**

### PREREQUISITE CERTIFICATIONS

- None

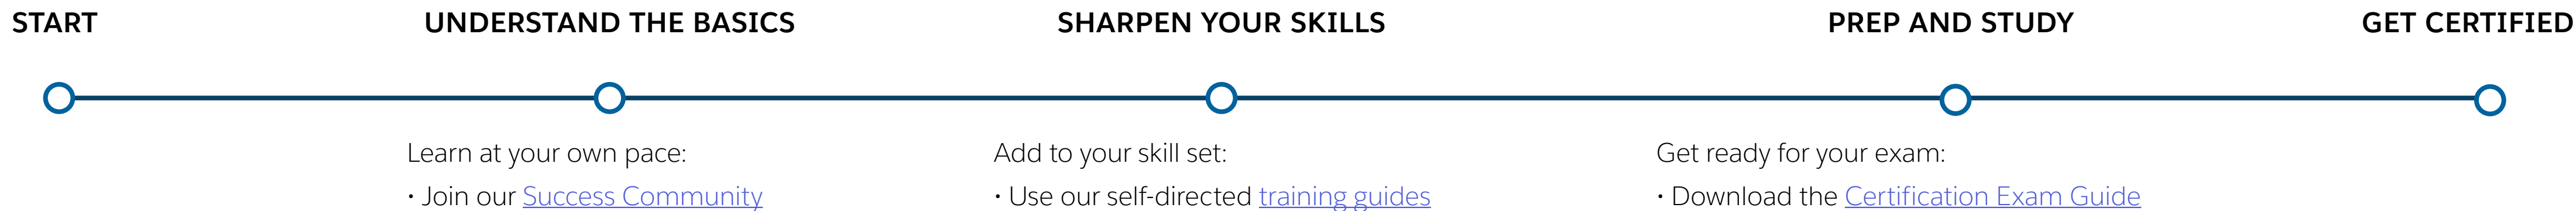

# SYSTEM ARCHITECT

The Salesforce Certified System Architect credential is designed for those who focus on factors such as testing, governance, and integration to other external systems.

## CERTIFICATION PATH

### OVERVIEW

Once all four prerequisites have been completed successfully, the Salesforce Certified System Architect certification will be granted.

You should consider earning both your Salesforce Certified Application Architect and Application Architect credentials. By earning these credentials, you'll take a big step toward preparing to become a Salesforce Certified Technical Architect.

### RELATED CERTIFICATIONS

- [System Architect](#)
- Application Architect
- Technical Architect

### PREREQUISITE CERTIFICATIONS

- Development Lifecycle and Deployment Designer
- Identity and Access Management Designer
- Integration Architecture Designer
- Platform Developer I

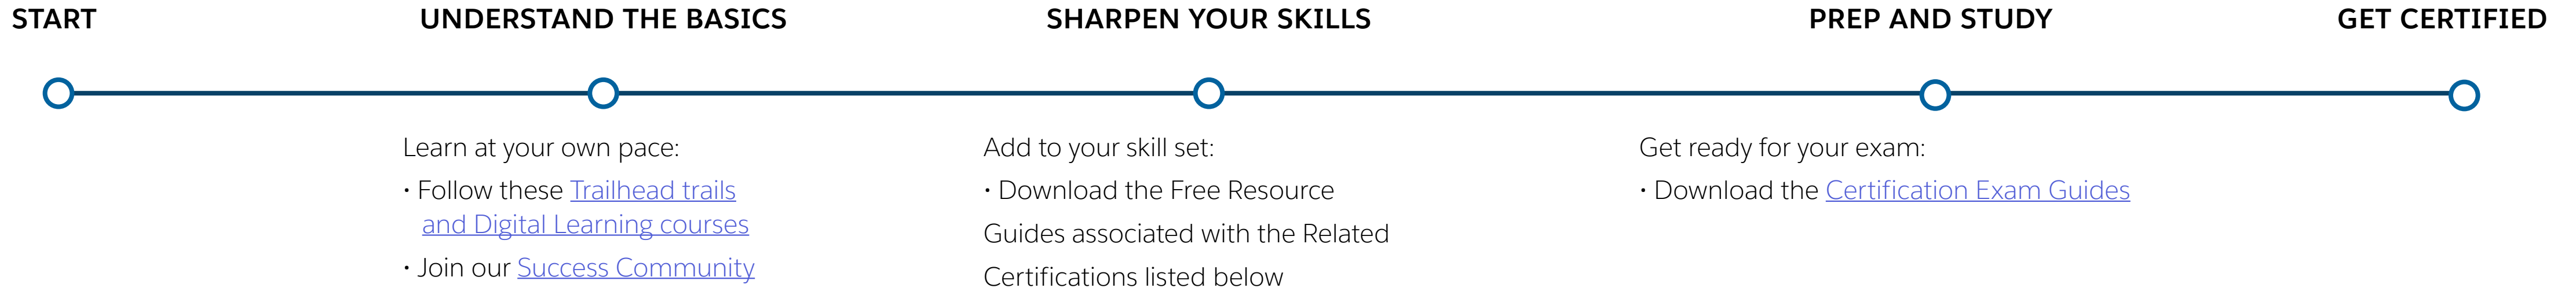

# TECHNICAL ARCHITECT

The Salesforce Certified Technical Architect credential is designed for those with broad knowledge across multiple development platforms, drawing on their skills in assessing customer architecture to design secure, high-performance technical solutions on the Force.com platform.

## CERTIFICATION PATH

### EXAM OVERVIEW

Here are examples of the concepts you should understand to pass the exam:

- Designing a technical architecture solution that may span multiple platforms and include integration and authentication across systems

- Managing the development lifecycle to ensure the delivery of highly secure solutions that are optimized for performance and built to scale
- Articulating design considerations, trade-offs, benefits, and recommendations for a technical architecture

### RELATED CERTIFICATIONS

- Data Architecture and Management Design
- Development Lifecycle and Deployment Designer
- Identity and Access Management Designer
- Integration Architecture Designer
- Mobile Solutions Architecture Designer
- Platform App Builder

- Platform Developer I
- Sharing and Visibility Designer
- Application Architect
- System Architect
